## Software Information and Pricing

A demo of our software may be downloaded by going to:

[www.yeadoninc.com/download/download.htm](http://www.yeadoninc.com/download/download.htm)

You will find step by step directions to download a demo to your computer. *This is a demo only and not a full working version.* What this will do is provide you a basic understanding of the software's capabilities and user friendliness.

Here are additional helpful hints in utilizing a demo:

To run a demo after opening the program:

1. Click *File, Open*, Double Click on selected demo
2. To understand input pages click on the toolbar for each input. Open forms. Roll the cursor over the input variables to view an explanation or click the diagram at the bottom of the form that defines input variables.
3. Click *Calculate* then open the output windows by clicking the buttons on the tool bar. Click the graph button to view the predicted performance.

For BLDC

Click *File*, select motor type IR or OR, click *Open* and proceed with steps 2 and 3 from above.

If you have any questions or concerns, please do not hesitate to contact us.
